RADIOMETER

The **PICO** A blood gas aspirating syringe

The PICO A aspirating syringe is intended for arterial and venous blood collection in pH, blood gas, oximetry, electrolyte and metabolite analysis.

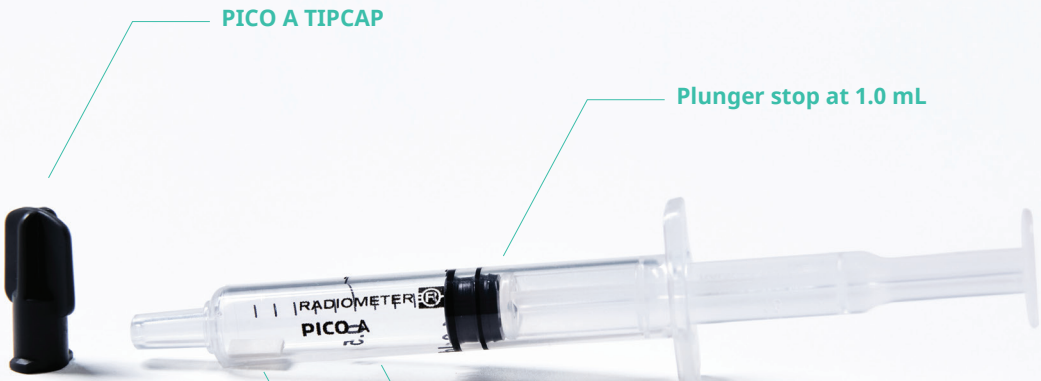

WHAT YOU'LL GET

1. **Draw the exact amount of blood needed for analysis using 0.5 mL volume mark**
2. **Reduce the risk of clots without diluting the sample**
3. **Minimize the risk of accidental blood spillage on the operator**

RADIOMETER

With **PICO** A collect exactly the amount of blood needed—and no more

- 0.5 mL label clearly shows the minimum amount of blood you need to measure all parameters on Radiometer blood gas analyzers
- PICO A TIPCAP reduces the risk of contact with patient blood and exposure to room air
- Uniquely designed heparin for reduced risk of blood clots
- Plunger stop at 1.0 mL to ensure plunger remains in syringe barrel, preventing accidental blood exposure
